

## More Digital Tools to Support Virtual Physiotherapy Care

### Client Communications: Mass Email Solutions

Need a solution to email groups of patients with information about your virtual care services? Example solutions include:

Email software	Website	Further Information
Mail Chimp	<a href="https://mailchimp.com/">https://mailchimp.com/</a>	Free if you have < 2000 people (patients). Can create a 'landing page' to use as the consent form, with the email signup. You can export the email list as a CSV into Excel
Office 365 Business and Enterprise		If you have already purchased Office 365 Business or Office 365 Enterprise, you already have capability to send mass emails. Please reach out to Microsoft Support on setting up the mass mail function

### Document Signing Solutions

Need a solution for your patients to sign a consent form for virtual care? Example solutions include:

Document Signing	Website	Further Information
DocHub	<a href="https://dochub.com/">https://dochub.com/</a>	DocHub is a document signing app which can be used to capture patient consent. It can be operated as a standalone application, or integrated into the Google suite as an add-on for easy access from Gmail or Google Drive. Unlimited document signing and sending for USD \$4.99/month
Docusign	<a href="https://www.docusign.ca/">https://www.docusign.ca/</a>	This tool could be used for capturing patient consent. CA \$33/month

### Other Tools - eFaxing

In the event that you are unable to send faxes when you are away from the practice, and you need an eFax solution which will enable you to send faxes. Example solutions include:

eFaxing	Website	Further Information
Fax Talk	<a href="https://www.faxtalk.com">https://www.faxtalk.com</a>	FaxTalk FaxCentre Pro is a stand-alone app which will allow you to fax documents from your computer. Has a one-time purchase fee of USD \$59.99 and a 15 day free trial
