

## May 4 - Physical Therapy Assistants are Part of Your Health Care Team

The Physiotherapist and Physical Therapy Assistant (PTA) work as a team. PTA's work with people of all ages and different medical conditions such as orthopedic conditions, neurological impairments, conditions associated with aging, developmental delays, and mental health issues.

Just like physiotherapists, you can find PTA's in variety of settings:

- In-patient hospital units
- Residential and multilevel care facilities
- Community centres
- Child development centres
- Private practice
